

Project out costs value.  
assignment - 7.

compare the cash and time in ~~extra~~  
cash flow)

$\Rightarrow$  This ~~approach~~ focuses on the

actual cash flow generated by

a project ~~with~~ without deliver for  
the time for this cash flow.

⇒ Simply sum up all cash inflows and outflow over the project lifetime.

⇒ Useful for understanding the total cash flow impact on the business helping in liquidity assessments.

⇒ The method account for the timing of cash flow where they occur and the present.

⇒ Cash flows are ~~using~~ are present using discount rate ~~reflection~~. The highlighting the importance for cash timing.

⇒ Cash outflow total while total time-weight emphasizes the more economic value over time.

⇒ Calculated compare due provide clearer picture project performance
